

Lecture Homework #6 (Due Sunday, 2/9 by 11:59pm)

1. Create a Jupyter Notebook in your `class-assignments` directory with the name `ch-8-exercises`.
 2. Answer questions 8.1 to 8.14 from the Chapter 8 “Things to do” section of the *Introduction to Python* book.
 3. To get full credit for this assignment, you must make 3 commits on 3 separate days (Friday, Saturday, Sunday), where you try to answer at least 3 of the questions each time. *Spacing out your coding practice is an effective strategy to get better.*
- **These exercises will help prepare you for the in-lab quiz on Monday.**
